CBAY Transcription Services, Inc. is the technology leader in medical transcription. Today we are moving forward to deliver you the best HIM solutions in healthcare.

CHANGES ARE ON THE WAY

The use of technology has never been more important in healthcare than it is today. This has always been the case in Medical Transcription and Health Information sector. CBAY Transcription Services, Inc. has been the technology leader for many years. We were amongst the first companies to dare using digital voice recorders over cassette tapes. In turn we were one of the pioneers in transcription delivery, via a secure HIPAA compliant solution, directly to your PC. Today we as a sector are entering some exciting times when it comes to

Health Care Information Technology. At CBAY we are a very excited to be right is the mix of it and have some exciting news and new offerings to help even more so with office and physician efficiencies. To show case some of them we invite you to read our updates below. You will find we now have a robust document management system that lives in the cloud instead of your desktop PC, a new website that will provide greater details, and an iOS application that will make another step forward. These change access to your patient records anywhere s gives you

access to your reports anywhere with an internet connection. This system also follows the growing to electronic health records (EHR/EMR). It seamlessly allows the flow of transcribed reports between systems with out user interaction.

We are also cutting the cord for doctors, as they can now dictate right over their mobile phone with our DVR APP. We were the doing what we did to cassette tapes to the digital recorder. We are allowing the dictator to have full control with one device to offload transcription over the air or via Wi-Fi.

What in this issue

1. We are launching our new web site.
2. New APP for iPhone and other Apple Devices (Android coming soon.)
3. Why you should upgrade to Web Report Pro today.

Updated Web Site Launching.

CBAY Transcription Services, Inc. is pleased to announce our updated website. For the clients already on the web version you most likely notice the new website upon login. The new site will be going live later this month. The location of the login has changed to the upper right hand corner. If you have any questions please feel free to contact our support team at 866-295-8583 x746.

Why you should upgrade to Web Report Pro?

If you are still one desktop Report Pro we strongly encourage you to switch to our all web-based version. This version has some great new features that will help your practice be more efficient and save even more money. There will be no charge to upgrade to the web-based version until the end of the year.

The web version brings in some great things including faxing, from our servers, at no additional cost or hardware to buy, delivery into EMR/EHR systems, iOS dictation support, location based tracking and many more features.

iPhone, iPad and iPod Touch dictation

We are very pleased to offer the ability to dictate on all iOS app devices such as the iPhone, iPad and iPod touch. If you are interested in this please contact us today to enable your account. We offer a simple free APP or a top-notch APP (\$18.99) that truly work with ease and basically mocks a \$300 digital recorder.

Reaction to this App has been outstanding with many providers already using it. The doctors are now free to dictate whenever they want with only needing one device.

With the application dictators are now free to cut the cord from the computer. The upload happens over the air by using either Wi-Fi or the cellular network.

CBAY iPhone APP.

At CBAY Transcription Services, Inc. we always are looking for ways to improve the end user experience. Thank
